SUMMARY

Final-year B.Tech CS student with hands-on experience building full-stack web apps and integrating browser-based and cloud AI models. Proficient in the MERN stack with a track record of shipping production-ready projects. Seeking an internship or remote role to contribute to ambitious engineering teams.

PROJECTS

Pathfinder AI – AI Learning Roadmap Generator

[Live](#) | [Source](#)

- Architected a full-stack app generating personalized learning paths via Groq Llama 3.1.
- Implemented JWT-based authentication and encrypted password storage for private user dashboards.
- Built a high-performance React 18 + Vite frontend with glassmorphism UI & Framer Motion.
- Secured backend with Express Rate Limit and CORS for reliable API communication.

• MongoDB	• Express.js	• React 18
• Node.js	• Groq SDK	• Framer Motion

Life Tracker – Privacy-First AI Diary

[Live](#) | [Source](#)

- Built a zero-server diary running semantic search models directly in browser via Transformers.js.
- Engineered local-first data architecture with IndexedDB (Dexie.js) ensuring 100% offline privacy.
- Delivered natural language memory queries, mood analytics, and JSON export/import.

• React 19	• Transformers.js	• Dexie.js
• IndexedDB	• Lucide React	• Responsive UI

Results Analytics – JNTUH Academic Dashboard

[Source](#)

- Built a React + Vite SPA enabling students to fetch JNTUH results by roll number in real time.
- Designed an analytics dashboard surfacing semester-wise marks, grades, credits, and SGPA.
- Rendered interactive charts and summary cards to track academic performance trends.

• React 18	• Vite	• JavaScript
• CSS3	• REST APIs	• Analytics UI

Mausam.ai – AI-Powered Chatbot

[Live](#) | [Source](#)

- Integrated Meta Llama API for advanced conversational NLP and streaming dialogue.
- Developed responsive real-time chat UI with async state management across client and AI engine.

• React.js	• Llama API	• JavaScript
• HTML5	• CSS3	• Async State

EDUCATION

B.Tech – Computer Science

St. Mary's Integrated Campus (JNTUH Affiliated), Hyderabad
Expected June 2027

TECHNICAL SKILLS

LANGUAGES

JavaScript (ES6+), Python, HTML5, CSS3, SQL, Java

FRONTEND

React 18/19, Vite, Framer Motion, Responsive UI

BACKEND

Node.js, Express.js, REST APIs, JWT Auth

DATABASES

MongoDB, IndexedDB, MySQL

AI & TOOLS

Transformers.js, Agentic AI, MCP Servers, GPT-Codex, Claude, Git, Vercel
